

HP XP222 Scitex Ink

Enjoy best quality even at the highest speeds of your HP Scitex XP series printer

Do you want to get even more from your HP Scitex XP series printer? With the latest addition to the HP Scitex line of UV curable inks, you can reach new levels of image quality, operational flexibility, and efficiency – even at the highest printing speeds.

The new HP XP222 Scitex Ink is an eight-color (CMYK Lc Lm Ly Lk) pigment-based UVC ink designed specifically for the XP series of HP Scitex printers*. It was especially created with quality and reliability in mind, and allows you to achieve higher printing quality, increase operational flexibility and reliability, and reduce ink wastage – all with less environmental effect. The higher quality further improves your business by allowing you to print sellable jobs at faster speeds.

* HP Scitex XP2100 Printer, HP Scitex XP5100 Printer, HP Scitex XP2700 Printer series, HP Scitex XP5300 Printer (in standard mode), and HP Scitex XP2300 Printer (in standard mode).

Progress to HP XP222 Scitex Ink and enjoy:

- Enhanced print quality – Matt finishing to reduce "gloss banding", even at high print speed.
- Reduced cracking and chipping.
- Improved reliability and efficiency – Prolongs "open time".

The HP XP222 Scitex Ink was developed to address the unique and evolving needs of HP customers. This new eight-color pigmented UV curable ink offers an ideal blend of enhanced printing quality, improved reliability, and reduced environmental impact. It replaces the current set of standard Nur Expedio inks, including HP XP220 Scitex Ink and HP XP221 Scitex Ink.

Enhanced quality at higher throughput

The new inks produce a matt finish that reduces the effect of "gloss-banding", even when printing at the highest of speeds. Now, you can work with maximum efficiency without compromising quality.

Reduced cracking

The HP XP222 Scitex Ink offers reduces cracking and chipping compared to the replaced HP XP220 Scitex Ink, so the print will last longer.

Improved reliability and smoother operation

The HP XP222 Scitex Ink prolongs "open time" (longest idle time between printings without the need for purging/puffing) to approximately two hours, reducing ink wastage, and lowering intrusive maintenance operations.

Reduced waste and EHS impact

Reduced volatility and irritations improves working conditions for employees.

Key details

- Eight colors – C, M, Y, K, Lc, Lm, Ly, Lk
- Pigmented UV-curable
- Up to 24 months' outdoor durability¹
- Delivered in 5-liter bottles (two in a box for CMYK colors)

¹ According to ASTM D2565-99 standard - tested in south Florida climate conditions.
